

One Point Eight Miles !

The Earl wanted coal from his seam
To get somewhere by the power of steam
But there was a very big problem
The other railway it cut right across them
The station was 1.8 milesaway

It wasn't fair

But the Earl he didn't really care !

The station was so far way
Walking there it might take all day
So they made a transport called the Dandy
Between 7 and 8 it was handy
The station was 1.8 milesaway

And it wasn't fair

But the Earl he didn't really care !

*1.8 miles x 3
Away*

At Lanercost we care and take part
At the station with colour and art
With bird boxes murals and planters
Mosaics and maybe some lanterns

The station's still 1.8 miles away

It's way up there

But together we really really care

IT'S OUR STATION!
