Wednesday 16 September 2026

Rail safety education added to England school curriculum

By RailUK-admin | September 8, 2026

Community Rail Partnerships

Across Britain there are over 75 Community Rail Partnerships, in excess of 1,300 station friends' groups and over 100 community stations, all working along railway routes to connect communities with the railways that serve them. Each organisation delivers a range of bespoke activities guided by the needs of their communities, and in many cases would be able to support the delivery of rail safety education through in-school lessons, assemblies and/or guided trips to support young people in gaining travel confidence. Find details of your local community rail organisation:

Map of members

PSHE Curriculum Sept 2026

Primary

- There's a greater focus on online safety and wellbeing. For example, pupils will learn about online financial harms such as gaming, video game monetisation, scams and fraud – as well as the reasons for age restrictions on online content such as gambling websites and social media.
- Within health education, there's still an emphasis on helping pupils understand their bodies and the changes they might experience — and now, this includes learning the correct names for body parts (including genitalia). This reflects established best practice when it comes to giving children the knowledge and understanding they need to stay safe, including the ability to identify and report signs of abuse, while reducing stigma.
- Addition of 'personal safety' to the statutory content, with an emphasis on recognising and reducing risk, in the context of fire and travel safety — for example around water, roads and railways.
- There's new learning around change and loss, including bereavement; recognising that this can cause a range of feelings, and that everyone grieves differently.
- Within relationships education there's new learning around communicating effectively, and developing the ability to be assertive and to express needs and boundaries.

[Programme of Study for PSHE education \(KS1-5\)](#)

PSHE Curriculum Sept 2026

Secondary

- PSHE is about children's real lives and to keep up with new and emerging issues young people are exposed to. This includes several references to 'AI literacy' and 'deepfake images' specifically at secondary.
- There's also a much greater focus on tackling misogyny, incel culture and their influence on attitudes towards women and girls and how they negatively affect boys and young men, as well as the harmful nature of pornography.
- For both primary and secondary, we see the inclusion of personal safety, which now includes fire safety and travel safety — for example around water, roads and railways. At secondary, young people will also have the opportunity to learn about knife crime and conflict resolution.
- At secondary level, pupils will learn more about menstrual and gynaecological health, including endometriosis and menopause. And there is greater emphasis on building skills to access healthcare services and professionals.
- A more considered language around mental health, and there's also a recognition of financial exploitation and its impact on safeguarding — including a requirement to cover scams, fraud, extortion and 'sextortion'.

[Programme of Study for PSHE education \(KS1-5\)](#)

The wider benefit to CRPs

- Schools have contact with a very large proportion of the community, working with a school also connects you to this community (e.g. Newsletters, parents' evening, social media)
- Combatting anti-social behaviour at stations – visiting a school gives the station a face
- Other Community Rail engagement – e.g. rail confidence trips, art projects
- Joint working with other stakeholders – TOCs, Network Rail, BTP etc.

ASSEMBLIES - KS2 / PSHE - KS2

Rail Safety Week 2025 – Primary Assembly

LOCATION	Classroom
LEARNING OUTCOMES	Students will understand rail safety, identify railway hazards, and demonstrate knowledge of safe behaviours to prevent accidents and ensure personal safety around trains and tracks.
DURATION	30 minutes

OVERVIEW

[This assembly has been produced by the Platform team for Rail Safety Week (16th – 22nd June 2025).

It has been carefully created to ensure children learn the most important safety messages about the railways, whilst also gaining confidence to travel by train. It covers all the key safety messages around staying safe at stations, high speed trains, electrification, trespassing and level crossings.

Top Tips for reaching out to schools

- When emailing schools – write who the email is for in the subject header – e.g. “FAO Year 5 teacher” or “FAO PSHE co-ordinator”
- Don’t just use one method to communicate – Email, call, send a letter, drop into the school reception in person.
- Mention if the engagement is free in the subject header or in the first sentence – schools have a lot of correspondence to sift through.
- Follow all your local schools from your organisation’s social media accounts – find out when events are and make sure they know when your events are too!
- Find the person responsible at your local authority who has all school email addresses and can send mailshots to all in the area.
- Find out when the local cluster headteacher networking event is – you could get an invite to it and talk about what you can offer.

DBS – an update

What is changing?

At the moment, some unpaid volunteers who work with children may not be classed as being in regulated activity if they are properly supervised by someone who is already in regulated activity.

From **1 September 2026**, that exemption will be removed.

This means that unpaid work such as teaching, training, instructing, caring for or supervising children will be regulated activity if it is carried out frequently, or if it meets the period condition.

The period condition is met where the person carries out the activity:

- ✓ on more than 3 days in a 30-day period; or
- ✓ overnight.

[Change to the definition of regulated activity with children from 1 September 2026 - GOV.UK](#)

Photographs

Should I take photos and videos of children?

In some cases, it may be safe and appropriate to take photos and videos of children during events delivered by your organisation. However, some children, parents or carers may prefer not to have photos or videos of themselves or their children taken. For example:

- families may have religious or cultural reasons for choosing not to have photos or videos taken
- children who choose not to have contact with some members of their family may want to minimise their online presence
- if a child and/or their family have experienced abuse, they may worry about images of the child being shared online, enabling the person who perpetrated the abuse to trace their whereabouts
- the child's identity may need to be protected because they are in local authority care or they have been adopted.

Rail Education Update Autumn 2026

Jess Young
Rail Education Officer
01325 405006
rail.education@bishopline.org
www.bishopline.org

We provide:

- **Free** rail safety workshops & assemblies.
- All age groups catered for.

We can help you meet Statutory Guidance for RSHE

The updated guidance includes rail safety education as part of the health and wellbeing curriculum content. Schools are required to be compliant from September 2026. The aspects below are taken from the Personal Safety section. Our **free** workshops and assemblies support schools in meeting these requirements.

Primary - How to recognise risk and keep safe around... railways, including level crossings. (pg 24)

Secondary - How to identify risk and manage personal safety in increasingly independent situations, including around... railways - including level crossings. (pg 31)

Considering a rail trip?

We can support you with planning your school trip by rail. Email rail.education@bishopline.org for our information pack for schools.

Rail Careers

We attend school and college careers fairs to showcase the broad range of career opportunities within the rail industry. Contact us to find out more.

The Railway 200 website continues and education resources can be found here:

4. Network Rail Community Safety Manager

Early Years Foundation Stage Framework – All children up to end of Reception

<https://www.gov.uk/government/publications/early-years-foundation-stage-framework--2>

The areas of learning and development

- 1.4 There are seven areas of learning and development that set out what providers must teach the children in their settings. All areas of learning and development are important and inter-connected.
- 1.5 Three prime areas are particularly important for learning and forming relationships. They build a foundation for children to thrive and provide the basis for learning in all areas.

These are the **prime areas**:

- Communication and language
- Physical development
- Personal, social and emotional development

- 1.6 Providers must also support children in four specific areas, which help strengthen and develop the three prime areas, and ignite children's curiosity and enthusiasm.

The **specific** areas are:

- Literacy
- Mathematics
- Understanding the world
- Expressive arts and design

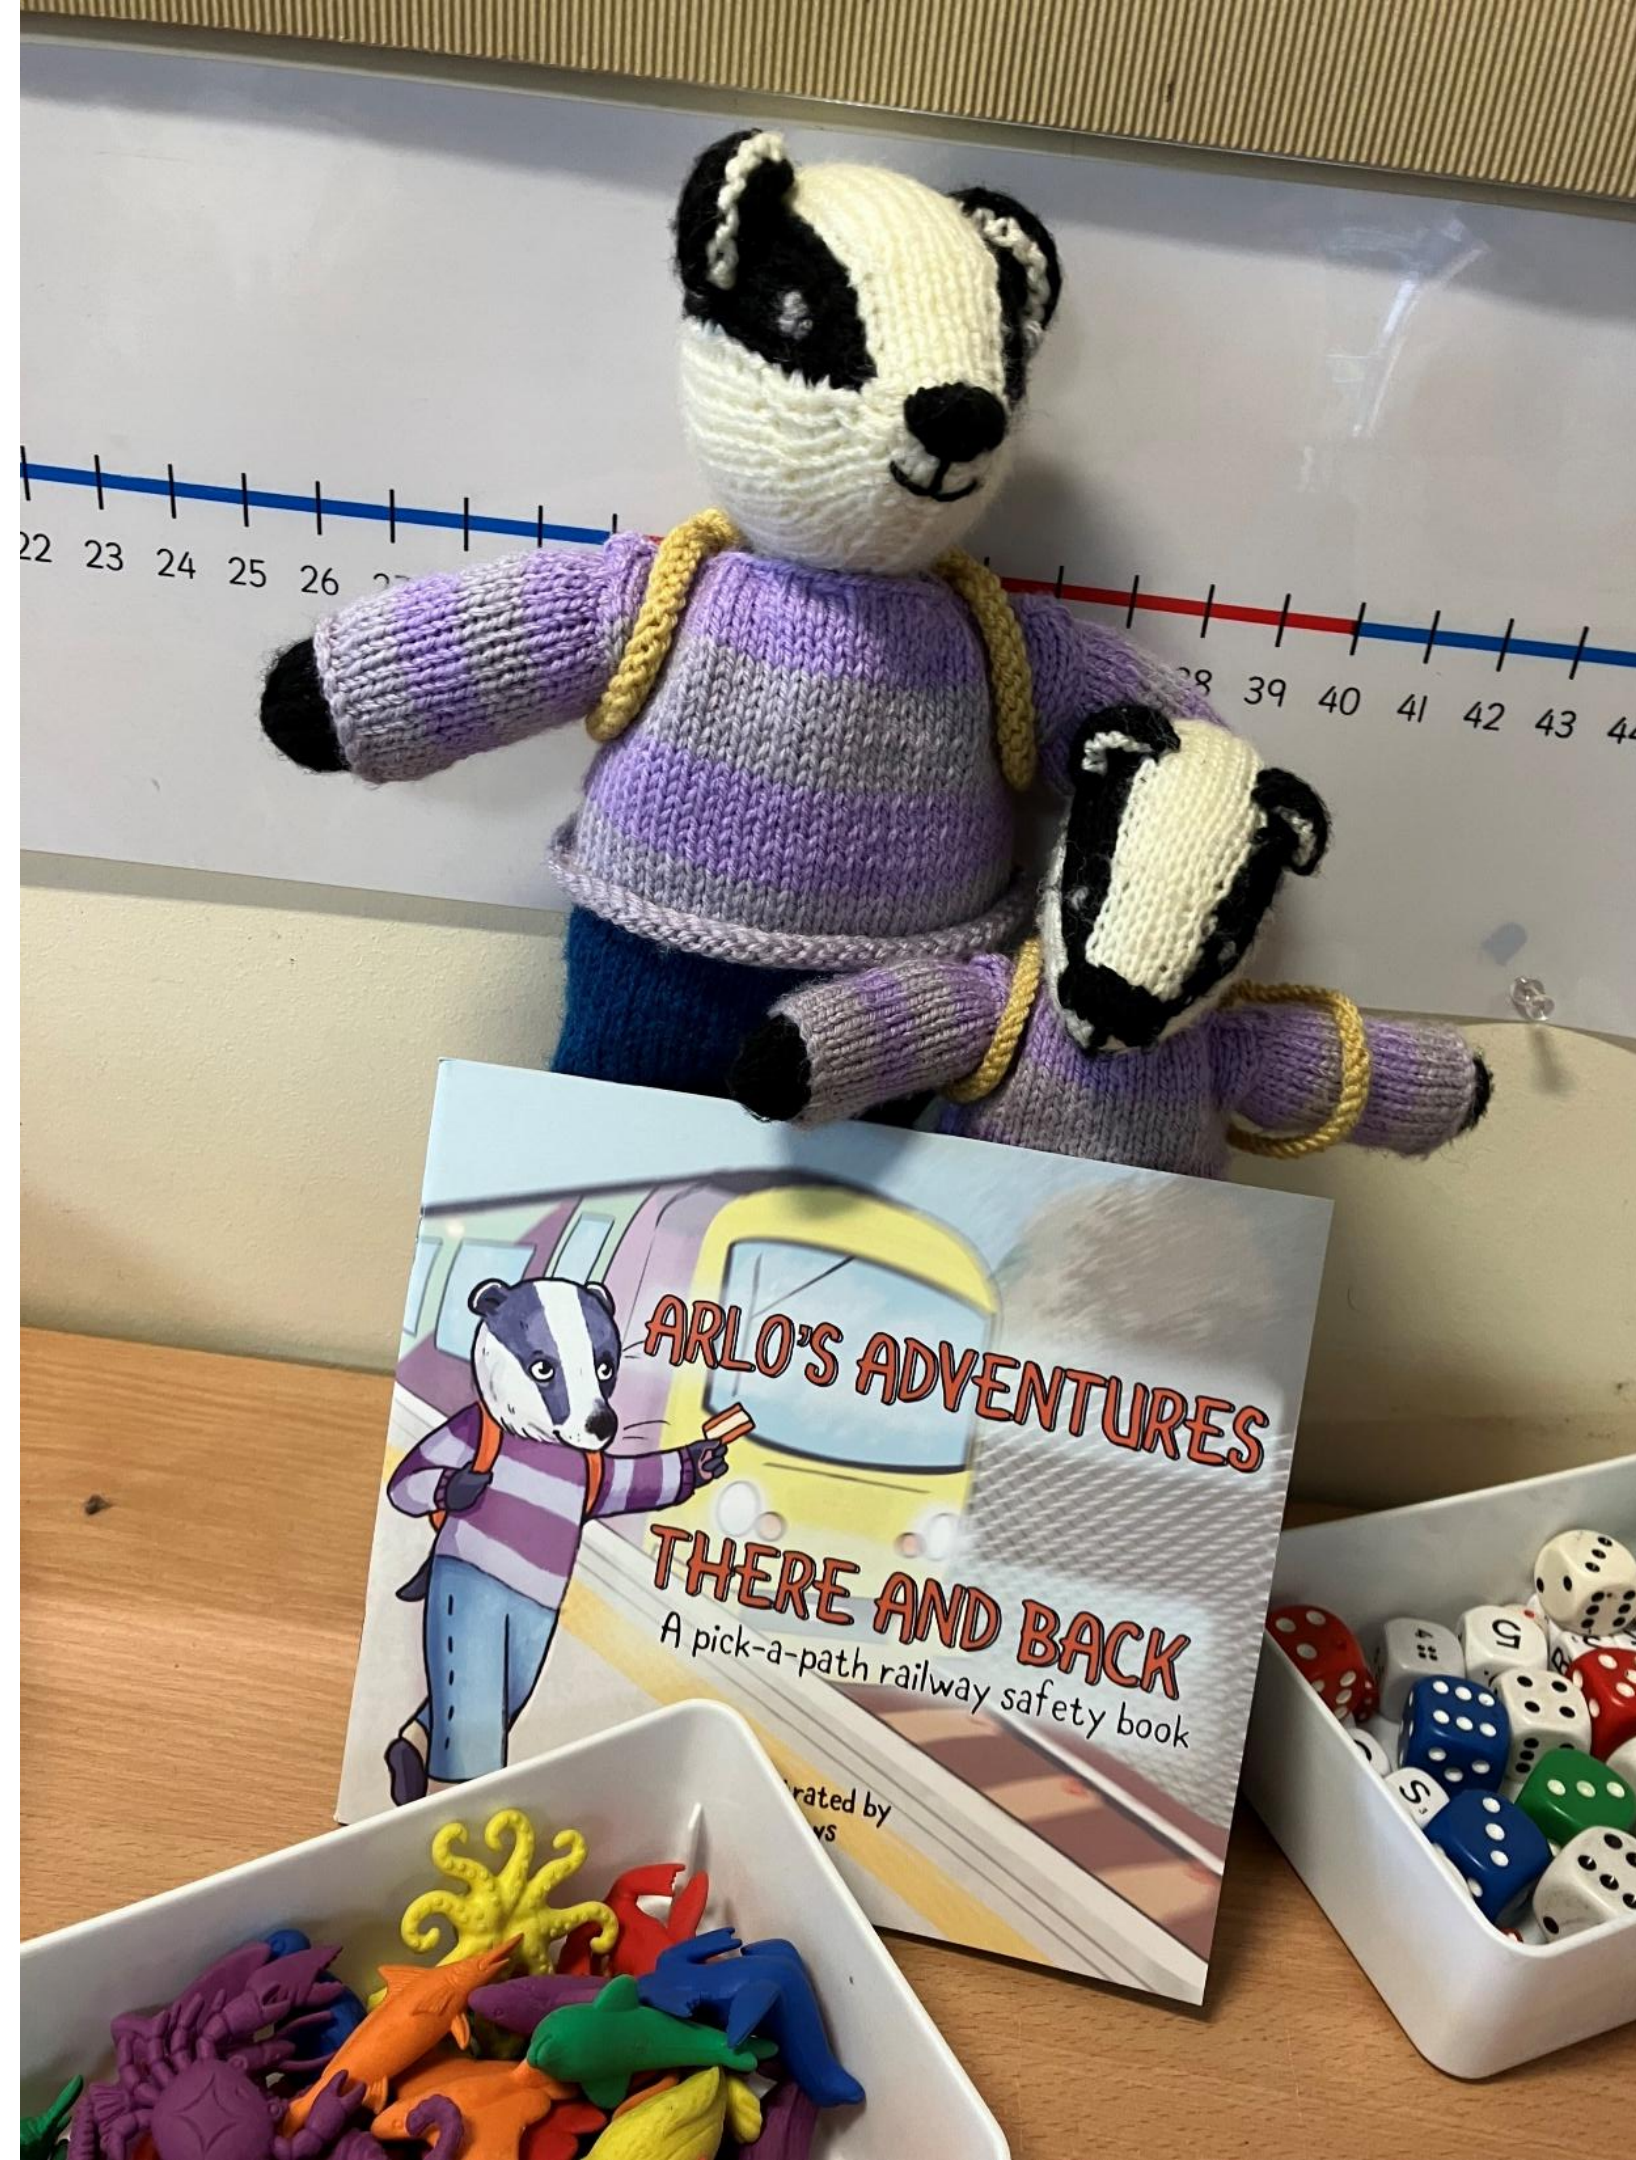

Personal, Social and Emotional Development: (3 ELGS)

ELG: Managing Self

Children at the expected level of development will:

- Be confident to try new activities and show independence, resilience and perseverance in the face of challenge.
- Explain the reasons for rules, know right from wrong and try to behave accordingly.

Key Stage 1 (5-7 years old)

Statutory Guidance for RSHE

The updated guidance includes rail safety education as part of the health and wellbeing curriculum content. Schools are required to be compliant from September 2026. The aspects below are taken from the Personal Safety section.

Primary - How to recognise risk and keep safe around... railways, including level crossings. (pg 24)

Secondary - How to identify risk and manage personal safety in increasingly independent situations, including around... railways – including level crossings. (pg 31)

Learning Objectives	To know how to keep myself safe when near or using the railway.
Success Criteria	- I know that stations and level crossings can be dangerous places. - I can talk about some of the dangers around the railway. - I can explain how to keep myself safe in a station or at a level crossing.

Primary - How to recognise risk and keep safe around... railways, including level crossings. (pg 24)

Rail Safe Rules

1

Stay off the tracks.

2

Use level crossing
safely.

3

Keep clear of the
platform edge.

4

Never retrieve anything
from the tracks.

5

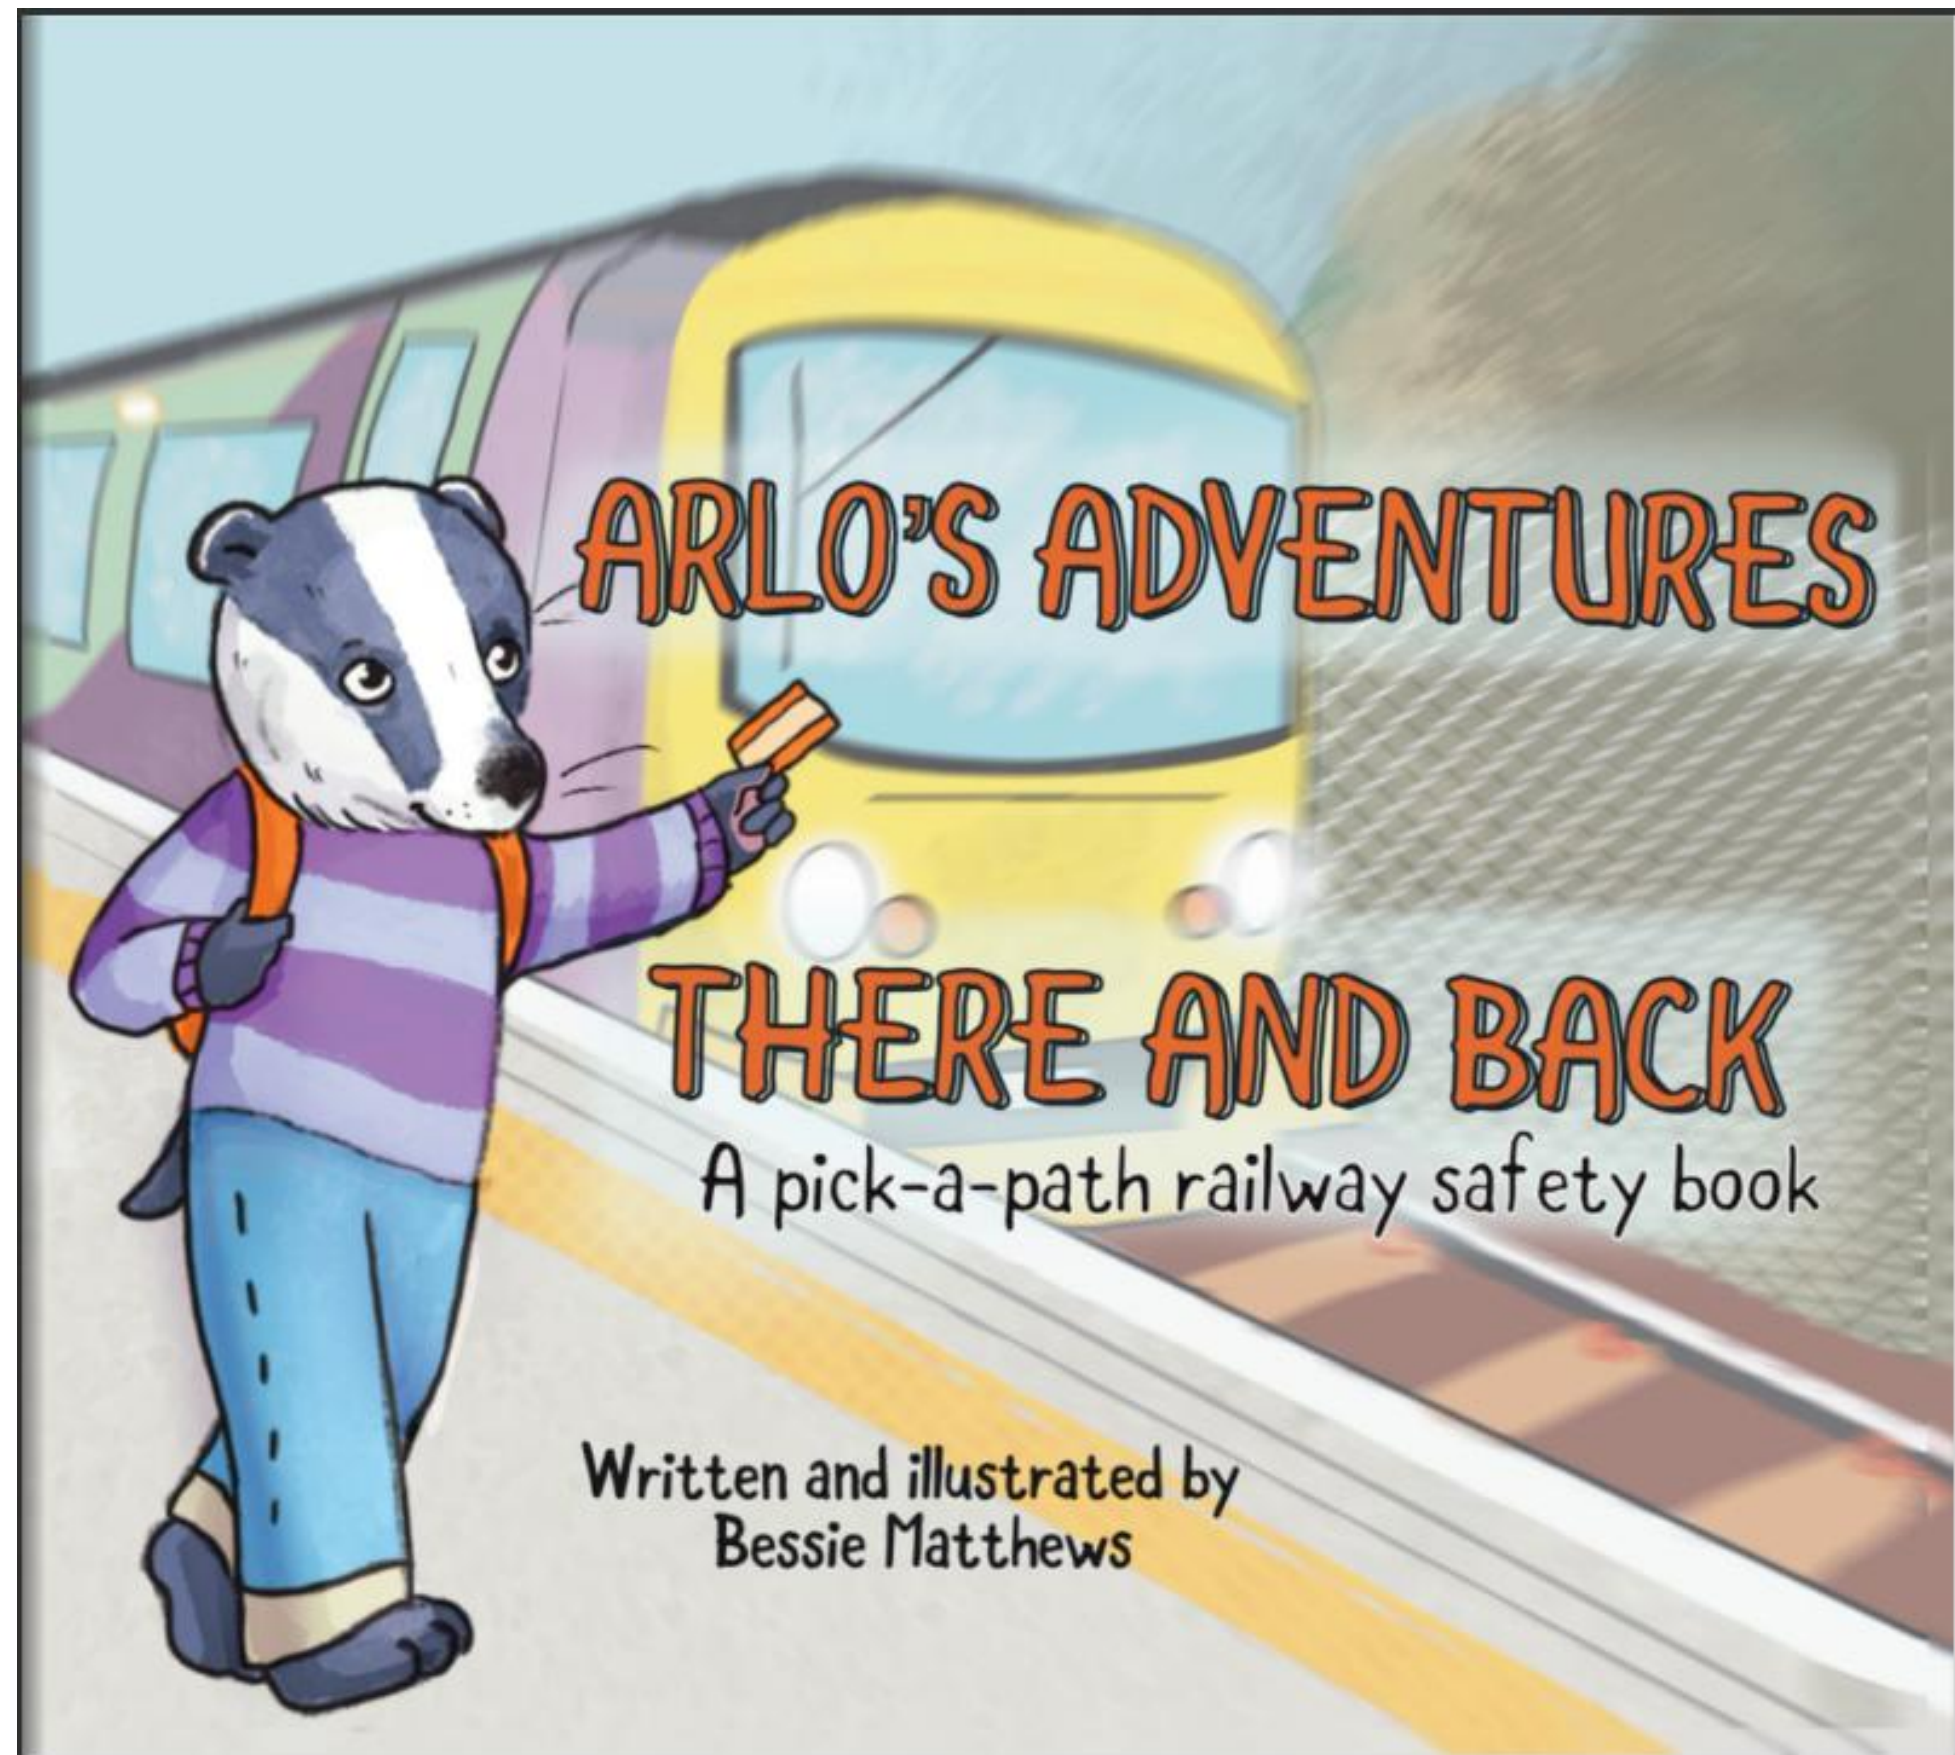

Be aware of electricity.

Clackety Clack, **Stay off the track!**

You'll be fine, **behind the yellow line!**

ARLO'S ADVENTURES

Top Tips for working with young children

Keep it simple – focus on a few key learning points.

Over-learn – practical/play activities to reinforce the learning. (simple songs and poems, actions, drama)

Not too long! – as a rule of thumb young children can focus their concentration for 1 minute for every year they've been alive!

Small Groups! – can the school tell you how many before you arrive?

Rail Safety Education

switchedonrailsafety.co.uk

SWITCHED ON!

Guest Presenter: Chloe Creffield – Community Safety Manager, Network Rail

Rail Safety Education really does help explain the risks of making that wrong choice around the railway

The work being completed is evidenced by this summer alone..

Every summer youth trespass and youth ASB has been the top category for incidents that have occurred

This year it had dropped to the 6th

A huge achievement!

But still so much more to be done

We have seen a huge growth in wrong choices like level crossing use...

- Ducking under barriers as they are closing or even jumping over closed barriers
- People being on their devices or wearing headphones as they cross

These choices have seen over 20 people tragically lose their lives over the past 20-month period, a huge increase on the year prior when we did not lose anyone to these reasons

You are all out in the community and can make a huge difference to who we reach

Completed in the past school calendar year...

234 schools on NE
visited with 35,574
engagements

+

20 community events
With 9,285
engagements

Providing a
Rail Social
Value of
£897,584

NetworkRail

NE Crossing Rail

August 2026 · Issue 46

A Drive Forward

Colleagues from across Network Rail and partner organisations are being invited to support a Performance Week on the Harrogate Line from 7 to 11 September 2026.

Working alongside Northern, volunteers will be based at stations across the route to observe operations, engage with customers and identify factors that contribute to delays and cancellations.

The insights gathered will help shape improvements to drive forward performance and reliability for passengers.

No operational competence is required, and volunteers can contribute for as little as a few hours.

The initiative offers a valuable opportunity to gain frontline experience, better understand operational challenges and play a direct role in improving the railway.

If you would like to get involved, please speak with your manager and complete the volunteer registration form available [here](#).

Every observation will help us better understand the challenges on this important route and identify opportunities to improve the customer journey.

Additional Support Request

Please contact community safety manager, chloe.creffield@networkrail.co.uk, if you would like to support the Year 8 Rail Safety Ambassador Event at Hull Paragon Station on the 17 and 18 September 2026.

We are looking for colleagues to escort the groups around the activities at the station and Hull Trains offices at Bond Street over the two days.

Heading To Safer Use

Network Rail Helps Put Rail Safety on the Vision Zero Map at Xscape Castleford.

Network Rail colleagues joined partners from across the region this summer to bring vital rail safety education to hundreds of families attending the West Yorkshire Vision Zero event at Xscape Castleford.

Over four Fridays in August, Chloe Creffield, community safety manager, was joined by Michelle Arnold, level crossing manager, Kirsty Mitchell, head of readiness and resilience, Luke Etheridge, planning and reporting manager, Adam Jackson, train running controller, Vicki Beadle, operations risk advisor, Darcy Collins and Milly Johnston from Siemens, and Dave Timlin from CK Rail.

Together, the team engaged with more than 800 visitors, helping to raise awareness of the dangers of the railway and promote safe behaviours around stations, tracks and level crossings.

The event forms part of the West Yorkshire Vision Zero initiative to eliminate all traffic fatalities and serious injuries by 2040, through safer infrastructure, responsible behaviours, safer vehicles and improved road safety education.

For Network Rail, the event provided a valuable opportunity to reach communities in Castleford and Featherstone, areas where concerns remain around misuse of the railway and unsafe behaviours at local level crossings.

Visitors of all ages were invited to take part in a range of interactive rail safety activities, including a Brio railway challenge, a magnetic rail safety game, quizzes and the popular 'Higher or Lower' safety challenge.

The stand encouraged meaningful conversations about the dangers of trespass, distractions around the railway and the importance of using level crossings safely.

Chloe Creffield said: "It was fantastic to be part of Vision Zero and bring rail safety into such an important community event. By engaging directly with local families, we can help people understand the risks and encourage safer choices around the railway and at level crossings."

Community Spirit Transforms Kirkstall Landmark

Network Rail and Northern have joined forces with local partners and residents to give the Kirkstall Bridge mural a vibrant new lease of life, bringing community engagement beyond the station and into the heart of the communities they serve.

Despite one of the summer's hottest days, more than 40 volunteers came together to repaint the much-loved bridge mural in Kirkstall and Headingly.

The striking new artwork, created through months of consultation with local schools, community groups and residents, celebrates the area's wildlife, heritage and community stories.

Led by artists from We Belong Here CIC and delivered in partnership with TCV Hollybush, the project was funded by Leeds Community Committees and supported by Network Rail and Northern.

The Communities Team at Northern and colleagues from Network Rail would like to thank everyone who gave their time, energy and creativity to the project.

A special thank you goes to artist Nat and the team behind the design, whose vision has created a colourful local landmark that will be enjoyed by residents and visitors for years to come.

NE Crossing Rail

Spotlight On Safety

Cleethorpes 999 Day Helps Put Rail Safety in the Spotlight.

Thousands of visitors enjoyed a day of community engagement, emergency services displays and safety education at the annual Cleethorpes 999 Day on 15 August, with rail safety playing a key role in the event.

Organised by level crossing manager Matthew Pye, the Network Rail rail safety stand was supported by volunteers Chloe Creffield, community safety manager, local operations managers Leah Downing and Martin Hopwood, Helen Hopwood, project manager, Georgina from TransPennine Express and PCSO Mark Dolby from British Transport Police.

Throughout the day, the team engaged with more than 800 people, sharing important rail safety messages and raising awareness of the dangers of trespassing on the railway, misusing level crossings and unsafe behaviour around tracks and trains.

Held on Kings Parade, Cleethorpes, the popular event brought together emergency services, partner organisations and community groups in a fun, family-friendly environment, giving the public the opportunity to learn more about the work carried out to keep communities safe.

Matthew Pye said: "Cleethorpes 999 Day provides a fantastic opportunity to engage directly with local people and share potentially life-saving rail safety messages. Thank you to everyone who volunteered their time and helped make the event such a success that far exceeded our expectations."

The event once again demonstrated the value of partnership working, with organisations coming together to promote safety, strengthen community relationships and create a memorable experience for visitors of all ages.

Major Safety Initiative Secured

A long-running rail safety challenge at Cherry Holt Footpath Level Crossing has reached a significant milestone, thanks to months of partnership working and community engagement.

Although the crossing is private and has no public right of way, monitoring by Michael Green, the local level crossing manager, identified up to 30 unauthorised users each day, including large walking groups and motorcyclists.

Network Rail initially focused on education, introducing additional signage, hosting a level crossing awareness day and working with British Transport Police to address unsafe behaviour.

When misuse continued, extensive work was undertaken with authorised users, British Transport Police, Nottinghamshire County Council and Network Rail's Liability team to find a sustainable solution.

Following confirmation that no public rights existed across the route, agreement was reached to secure the crossing on safety grounds.

After overcoming a number of challenges, including arrangements for Royal Mail access, the crossing gates were successfully locked on 29 July 2026.

The gates are now secured, supported by improved signage and liaison with Network Rail communication team and British Transport Police. This has reinforced the private status of the crossing, reduced opportunities for misuse and improved safety for authorised users.

The crossing will continue to be monitored to assess the effectiveness of the controls implemented and identify any residual risks that may require further action.

Michael Green says that this successful outcome demonstrates the positive impact that can be achieved through collaboration, persistence and a shared commitment to keeping people safe around the railway.

Misuse Reaction

Following a recent risk assessment which identified incidents of misuse at a footpath level crossing near Whitwell, Nottinghamshire, Network Rail colleagues organised a community awareness day to help local people better understand how to use the crossing safely.

Relief level crossing manager, Edmond Roberts led the initiative, supported by route level crossing manager, Andy Cunningham and fellow level crossing managers Michael Green and Matthew Pye.

Throughout the day, the team engaged with local residents, sharing safety advice and discussing the risks associated with unsafe crossing behaviour.

The event was well received by the community, with local residents appreciative of the opportunity to learn more about railway safety and discuss their concerns directly with Network Rail colleagues.

By working closely with local users and promoting safe behaviours, the team hopes to reduce misuse at the crossing and help keep both the public and railway services safe.

Network Rail is also looking to continue these positive conversations with the local parish council to help address existing issues and support long-term improvements in the area.
